

AUTHOR STATEMENT

- This story is appropriate for the entire family, people of all ages and genders, especially if they relate to animals. It was written to bring motivation and self-esteem to anyone facing a challenge or just enjoys a real “feel good” animal story.
- The full color illustrations and color therapy was developed with the intention to “feel good in the hands of the reader” bring comfort to a child who can't read yet, the older person who cannot read anymore and everyone in between. Because of the comfort and sense of hope the story brings to the reader, it is well worth the modest and competitive price.
- Readers can find *Little Brave Heart Tells His Story* anywhere books are sold. If your favorite local store doesn't have it in stock, they can easily order it. It is available at Ingram Wholesaler and Overdrive.
- Being a true story of a bird's accident and how he had to focus and believe in his inner strength to achieve recovery, anyone at any age can relate and find joy in this story and perhaps look inside themselves for the same motivation.
- Being a true story with the uniqueness of the bird telling the story, this book holds a special “closeness” between the reader and the dove, Little Brave Heart. Children and elderly alike have slept with this book because they love this little dove.
- My plan is to engage in an aggressive campaign of book signings, festivals, library and school story telling as well as Trade Promotion Ad Placement with Baker and Taylor, Goodreads and Social Media.
